Crime Information Bureau

Service With a Payoff

Since 2000, the FBI's Criminal Justice Information Services Division (CJIS) has been cooperating with the Social Security Administration to match wanted person records with records of certain SSA benefit recipients. Specifically, the *Personal Responsibility and Work Opportunity Reconciliation Act of 1996* (Public Law 104-193) disqualifies wanted felons and probation violators from receiving Supplemental Security Income benefits.

Your warrants, visible in the NCIC/CJIS wanted person file, are shared with the SSA. To date, this national matching program has resulted in the apprehension of 2,212 persons, and SSA reports savings of $145 million. CJIS calls this its "FIND" program – Fugitive Information Notice Delivery.

Obviously, people receiving benefit checks have some interest in reporting a current and accurate address to the SSA. The complicated part of the program is giving law enforcement sufficient notification to apprehend the subject before SSA terminates benefits. Under the memorandum of understanding between the FBI and SSA, the warrant entering agency is notified of the subject's current address, and the SSA agrees to wait 60 days before taking any benefit cancellation action.

The success of the program is spurring similar efforts elsewhere. The Massachusetts State Police have obtained address information from various state agency benefit sources, and will be getting a copy of the NCIC wanted person file for matching.

The *Work Opportunity Act* also gave the Department of Housing and Urban Development (HUD) authority to evict public housing tenants, and gave the United States Department of Agriculture (USDA) authority to terminate food stamp benefits for wanted felons and probation violators. In March of this year, HUD approached CJIS for a copy of the file. USDA programs are administered by states, so there isn't an easy way to manage a national matching program. Nevertheless, Arizona's Office of Special Investigations intends to match NCIC records with Arizona its food stamp recipient list. Other states are expect to do the same.

In all these instances, Wisconsin wanted felons and probation violators are visible to the matching programs, and it is inevitable that some of your records will show up as a match, and you will receive a "FIND" notification. I'd be interested to hear your experiences and details on how you coordinate arrest and extradition. *e*message me.

2002 Training and Audits

During 2002 the Field Services Unit conducted 194 training classes attended by 2,330 students. The number of classroom training sessions and attendance continues to decrease as agencies continue to transition and take advantage of online training. In addition to the CIB provided classroom training, local agencies provided MDT certification training to over 2000 personnel, 1261 initial MDT certification training and 940 MDT re-certifications. Following is a breakdown of CIB instructor-led classroom training by class type.

2002 TIME Training

Class Type	Number of Classes
Identification	9
AAI	15
TAC	21
Validation	22
Recertification	30
Inservice	30
Advanced	26
Basic	41

Basic	662

Web-based Training

CIB continues to move forward in using the Internet to provide TIME System training. The TRAIN (Training Resources Available on the Internet) database as of December 31, 2002, contained 18,708 users and 992 organizations. Pilot agencies began testing online training courses in May of 2001 with statewide release of re-certification exams on September 13, 2001. The *e*TIME operator online agreement was released in December of 2001, and the first actual online training module was released in February 2002. During 2002 additional training modules were developed and released statewide. As of December 31, 2002, three online re-certification exams, one online operator agreement and eight training modules are available to TIME System users in Wisconsin. The online training modules allow users to obtain MDT and Basic TIME System certification online in lieu of classroom training. As of December 31, 2002, 3,790 total online courses have been completed, including 3,383 in 2002. The following charts break down the 2002 completions by month and type of course.

2002 TRAIN Online Completions

Month	Quantity

2002 TRAIN Online Courses

| Course	Number of Completions
Online Module Courses	403
eTIME Online Agreement	449
Advanced Recertification	675
Basic Recertification	435
MDT Recertification	1421

Audits

In addition to providing statewide training the Field Services Unit also conducts audits of local law enforcement agencies as required by NCIC. These audits include a review of the local agency procedures, system security, personnel training status and entered records. A report is prepared and mailed to the agency upon completion of the audit. CIB implemented a new mail audit policy in 2002. If an agency has query access only to the TIME System the audit was conducted by mail since records would not be reviewed. Two hundred and seventy six (276) TIME System audits were conducted in 2002 including 200 by mail. A summary of the results of the record review is shown below.

[Light bars = Accurate / Dark bars = Complete}

2002 Wisconsin Agency Audits

TIME Trivia TEASERS

How well do you know your TIME System? Can you answer these questions about the system? Answers can be found on page *14.*

1) TRUE or FALSE: *e*TIME users can query an out-of-state person or vehicle records.

2) Wisconsin snowmobile and ATV responses from the DNR show both a registration number and a decal number. Only one of these numbers physically appears on the vehicle. Which of the numbers, registration number or decal number, appears on the vehicle and should be listed on a stolen vehicle entry?

3) One of the more common Securities File entries is stolen US currency ($1, $5, etc.). When entering securities, the user must use a 2-character code to indicate the type of security being entered. What is the correct type code for US currency entries?
   a.   FB – Federal Reserve Bank Note
   b.   UN – US Note
   c.   FR – Federal Reserve Note
   d.   NB – National Bank Note

4) How many hit confirmation requests were made on missing persons through the TIME System from 03/01/03-03/30/03?
   a.   123
   b.   203
   c.   1230
   d.   2030

2002 TIME System Statistics

The TIME System currently consists of over 6,928 terminals located in criminal justice agencies throughout the state. These terminals consist of three general access types:
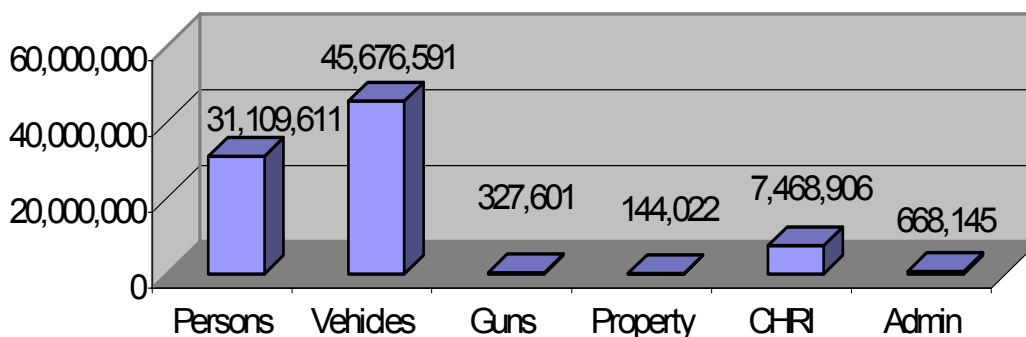

♦ Mobile Data Terminals or Computers
♦ Vendata Enforcer Terminals
  ♦ Direct Connect
  ♦ Gateway/Clients (accessing through a network connection)
♦ Interface Workstations (accessing through custom interface software)

Number of Terminals Breakdown

Interface Workstations
29%

MDT
48%

Vendata Clients
19%

Vendata Direct Connects
4%

The total number of transactions within the TIME System continues to grow. The TIME System processed 85,394,876 transactions between January 1, 2002 and December 31, 2002. Person and vehicle transactions continue to represent the majority of the TIME System traffic.

2002 Transaction Summary

|					
60,000,000	45,676,591				
31,109,611				7,468,906	
40,000,000					
20,000,000		327,601	144,022		668,145
0					
Persons	Vehicles	Guns	Property	CHRI	Admin

TIME System Stats

The TIME System experiences its maximum average usage between the hours of 4:00 PM and 5:00 PM. The lowest volume of TIME System traffic is between 4:00 AM and 7:00 AM. The normally scheduled TIME System, Department of Transportation and NCIC maintenance during this time frame may partially explain this.

Average Transactions by Hour

TOP 10 *e*TIME AGENCIES & USERS FOR 2002

La Crosse Police Department ran a total of 9,700 + queries on *e*TIME during 2002 and continues to be one of the top agencies thus far in 2003.

La Crosse PD	9,719	Brown County SO	1,187
Green Bay PD	2,493	Dodgeville PD	1,106
US Customs Service-Milwaukee	2,367	Wausau PD	1,043
UW-Platteville PD	1,628	Fennimore PD	1,035
Barron PD	1,461	Green County SO	1,030

The following numbers represent individual users (their initials) at these agencies that put *e*TIME to task in 2002. It is especially important to highlight Onalaska PD, Richland Center PD and UW-Platteville PD as their only direct access is through *e*TIME.

La Crosse PD (NO)	3,296	La Crosse PD (AG)	1,201
US Customs-Milwaukee (PB)	1,939	**Onalaska PD** (TL)	**988**
La Crosse PD (RB)	1,823	Verona PD (MD)	864
La Crosse PD (KN)	1,503	**Richland Center PD** (AC)	**857**
Green Bay PD (RS)	1,282	**UW-Platteville PD** (EB)	**797**

If you are not already an *e*TIME user, you may want to make plans to sign up. Questions on the above numbers may be directed to Vickie Stamn at stamnvl@doj.state.wi.us or 608/266-7955.
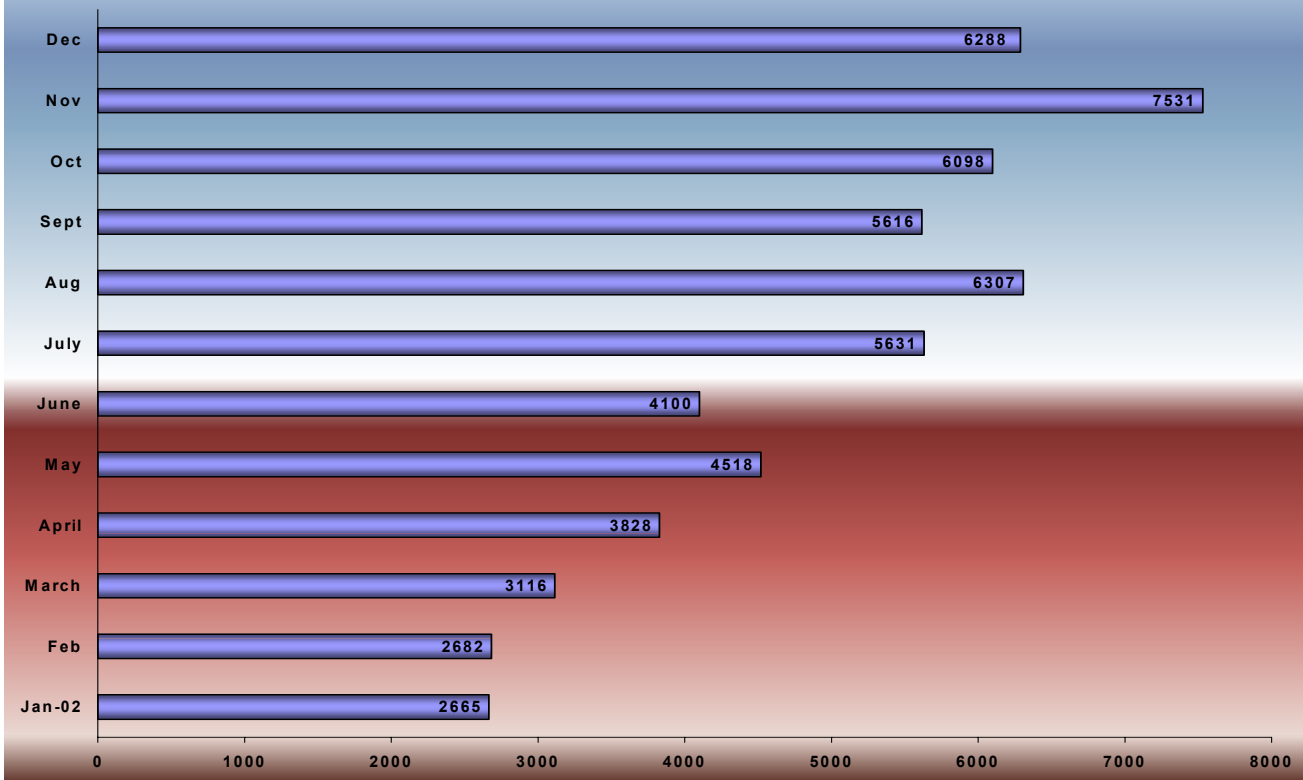

2002 STATISTICS

During calendar year 2002 58,380 person and vehicle transactions were run on *e*TIME; November 2002 surfaced as the highest month with a total of 7,531 transactions. As of December 29, 2002, 433 agencies with a total of 945 authorized users access *e*TIME. Currently, 67 agencies with 137 users that would otherwise not have any type of system access, are using *e*TIME. The 67 include DNR Parks and Correctional Offices.

**58,380 *e*TIME Person/Vehicle Transactions Processed January-December, 2002**

DL Info Now Displays On *e*TIME Response

Effective March 26th, *e*TIME responses from DOT on a driver's license display pertinent information at the top; similar to the DOT response page for a vehicle query. In the first example below, note subject has 2 types of driver licenses, their status, class, endorsement and restrictions. In the second example this subject possesses Personal ID card only. Questions/comments: Contact Vickie Stamn, stamnvl@doj.state.wi.us or 608/266-7955.

Have you sent a query to NLETS via *e*TIME?

On February 5, 2003 at 6 am, CST, out-of-state drivers and vehicle queries were made available to Wisconsin *e*TIME users. Wisconsin proved a major goal – that web services can be used as a communication method.

The January 2003 *TIME System Newsletter* explained the AISLE (Advanced Information Sharing for Law Enforcement) award grant. The AISLE Project, funded in large part by a National Institute of Justice (NIJ) grant to NLETS, is a proof-of-concept for communication between the Department of Justice (DOJ) *e*TIME System and NLETS using leading-edge technology.
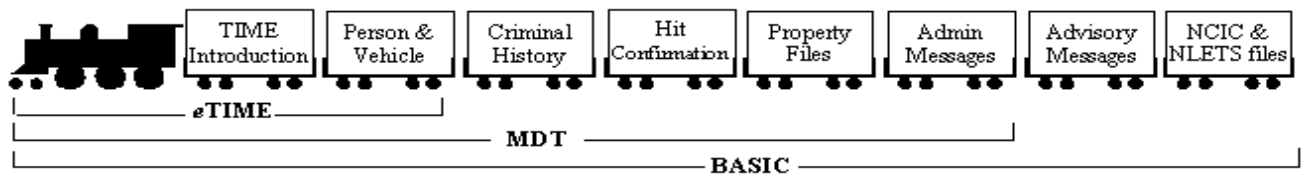

The Project will meet the following objectives:

- Prove that we can communicate server-to-server, from DOJ to NLETS (and thereby to other data services and customers), using web services.
- Create Wisconsin standard XML schemas for *e*TIME initiators and responses.
- Provide *e*TIME users access to some out-of-state NLETS queries and also some additional new in-state queries.
- Provide an *e*TIME interface that allows users to select the data service(s) they would like to query on a per-query basis.
- Provide access for *e*TIME users to Wisconsin's criminal history database (CCH).
- Provide criminal rapsheets from CCH in the national-standard, XML format.

So what is DOJ working on next? **CRIMINAL HISTORY ACCESS TO *e*TIME** ☺

- Creation of a criminal history rapsheet in XML format following the Joint Task Force's rapsheet schema version 2.20.
- Access to Wisconsin Criminal History (CCH) information through *e*TIME.
- Access to out-of-state criminal history information through *e*TIME. This access will be through NLETS.

Further updates on the progress of CCH access will appear in the *TIME Newsletters*. Feedback – contact Vickie Stamn at 608/266-7955 or stamnvl@doj.state.wi.us

Welcome to the newest feature of the
*TIME Newsletter…*__TRAIN Tips__ **(Training Resources Available Via the Internet).**

First, we would like to bring you up to speed on this initiative. At our 2001 business meeting we were pleased to announce that the TIME System Recertification Exams, for both MDT/MDC and full query personnel, were now available on-line through TRAIN. Since that time, our TIME and Technical Unit were busy developing the on-line content for the MDT/MDC and Basic TIME System certification. Effective January 2003 this training became available to law enforcement agencies (CIB will continue to offer the two-day Basic classroom training).

This training has been broken down into individual on-line training modules specific to the degree of TIME System training required. To acquire MDT/MDC certification, individuals must successfully complete the following modules:

Module 1   TIME System Introduction (this module must be taken before individuals may proceed with completion of the following modules)
Module 2   Person and Vehicle Queries
Module 3   Criminal History Queries
Module 4   Hit Confirmation
Module 5   NCIC Property Files
Module 6   Administrative Messages

To acquire Basic TIME System training certification individuals must complete the following modules:

Modules 1-6   **and**

Module 7   Advisory Messages
Module 8   Additional NCIC and NLETS Files

To begin this certification process, the individual(s) must first be entered into the TRAIN database. This can be accomplished by sending the following information, via email to cibtrain@doj.state.wi.us:

Student(s) full name (first name, middle initial, last name)
Job – this mirrors the current TIME System certification level (i.e., *e*TIME, MDT/MDC Basic and Advanced)
   **and**

Agency
If this individual will be taking the on-line course or classroom.

Once this information is received and entered into the database agencies will receive a return e-mail advising of such completion with instructions on how to proceed.

A question often asked is "why doesn't the grade show"?

After an individual(s) has completed the on-line exam, they must "click" the **score exam** button and then "click on" the **submit and exit** button. Failure to do both of these will result in the grade not posting to the database. If these two steps are not complete, grades will not be able to be viewed by either TRAIN Administrators or the employee.

Now on to the "tip"

How do I, as a TRAIN Administrator, view the grade of an individual for a specific class/training?

After logging into TRAIN, across the top of the screen, you will see an option of "Employee Information": click on this. A current list of employees in the TRAIN database will appear.

Click on the name of the individual you wish to check.

On the left hand side of the screen you will see an "icon" for "Training" click on this.

Scroll down and click on "Previous Training". This will give you a list of the classes/training that this particular individual has completed.

Find the class you wish to inquire as to the grade and find the caveat that says "Display Event Roster".

Click on that and it will show you the names/scores of individuals, from your agency only, who attended that class/training.

As stated previously, this is a new feature to the newsletter and if you have questions you would like answered in this area, please submit them to cibtrain@doj.state.wi.us.
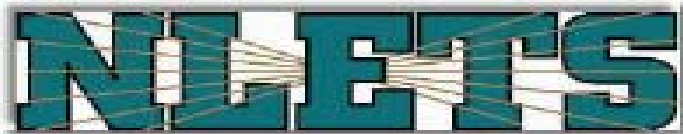

TSCC

TIME System Control Center

The TIME System Control Center (TSCC) is manned 24 hours a day / 7 days a week with operators available to help agencies regarding problems with the TIME System, Enforcer 4.0 software (if applicable) or Badgernet Telecommunication circuits. As more and more agencies begin to use WILENET, *e*TIME and TRAIN online, the TIME Control Center can also give you a status of the application and whether they are experiencing any connection problems.

We request that agencies give TSCC advance notification of moves into new buildings, equipment moves or activation of new terminals. This allows the operators to be prepared in case the agency encounters problems and needs their help.

To contact the TIME System Control Center you can either send an administrative message to TSCC or call 608-266-7633.

Homeland Security and Administrative Messages (HS, HSL and AML)

In response to recent national needs along with direction from the NLETS Technical and Operations Committee, NLETS has created 3 new message key types. The Homeland Security Alert Message (HS), the Administrative Message for law enforcement only (AML) and the Homeland Security message for law enforcement only (HSL). The AML and HSL message keys were created to allow agencies to utilize NLETS "All Points" messaging in a more selective manner by sending the message to only those agencies fitting the definition of "Law Enforcement Only". The HS and HSL message keys remain limited to the FBI and DHS for broadcast.

Today we have the capability to receive out-of-state AML messages, but plan in the future to create this message key in the TIME System for in-state agencies. Each of these message types when sent to WI are automatically forwarded to each agency listed in the broadcast group. If your agency would like to receive these message types and are not today, contact Chris Kalina at 608-266-7394.

Effective March 10, 2003, the Wisconsin **Computerized Criminal History (CCH)** rapsheet was modified to display disposition information in a manner that permits easier interpretation. Final disposition and sentencing information now includes a numeric association to the corresponding arrest charge. *The example below shows two disposition entries for charge number **01** and one disposition entry for charge number **02**.*

New DNR Transactions

Five new DNR transactions have been created to replace the current DNR transactions in the TIME System. These new transactions will allow expanded access to the DNR Automated License Record System (ALIS) to include all licenses issued by the DNR. The new transactions, described below, will appear on the soon to be released Enforcer 4.0 software Menu under Department of Natural Resources. For Interface agencies, we will continue to support the existing transactions until they are no longer needed.

Existing Transactions (as of 1/1/2003)

Query ON: **Files Searched**

0961 – Query WI DNR Violation/Conviction File by Name, DOB, SSN# and Customer ID #.
See transaction 0958 – Same informational response. This transaction allows the user the ability to enter a "wild card" (wild card is the % symbol) in the last and first name fields for partial name searches (ex: Last name: John%, First Name: Will%)

0962 – Query NLETS Wildlife Crime Information System - New NLETS Wildlife Crime Information System transaction that allows you to obtain wildlife violator information from other states by Name/DOB and/or SSN#.

WILENET
Wisconsin Department of Justice

Correction to address information from Volume 2003-1, page 2. "Mail or fax requests to: **Sharon Miemietz, WILENET Manager, Wisconsin Department of Justice, PO Box 7070, Madison, WI 53707-7070. Fax: 608/266-7869.** The written request should include the full name and social security number of the person needing access to WILENET".

Answers to TIME Trivia TEASERS

How well did you do? Below are the answers to the TIME Trivia Teasers:

1) TRUE-*e*TIME users can query out-of-state persons or vehicles via NLETS.
2) Only the decal number actually appears on the snowmobile or ATV.
3) Did you have to take money out of your wallet for this one? The correct code for entering US currency is FR – Federal Reserve Note.
4) The TIME System processed 123 missing person hit confirmation requests from 03/01/03-03/30/03.
